EXPERIENCE

Python Developer (Internship) — Sep 2023 - Present
CognaTech — Pune, Maharashtra, India

- Working on Django framework, a high-level Python web framework, to create and maintain web applications.

Online Coding Platform:

- Worked with Team on the frontend and backend, delivering the project within time constraints.
- Designed and implemented features for coding assessments and hosted with CI/CD integration.

Human Resource Information Management System:

- Handled the Back end part of the project and Hosting of the Project.
- Supported Team, reducing CI-CD burden and allowing for increased focus on higher-performance tasks.

PROJECTS

Personal Portfolio. Created a personal portfolio using HTML, CSS, and JavaScript with a beautiful UI design. Hosted the portfolio on Netlify with continuous integration and continuous deployment (CI/CD) using GitHub. You can view the portfolio at https://tejassawant.netlify.app/.

Food Ordering System. Implemented a Django-based food ordering system with features for menu management, order processing, and user authentication.

EXTRA-CURRICULAR ACTIVITIES

- Participated in hackathons, collaborating with teams to develop innovative solutions to real-world problems.
- Represented the college in various sports events, demonstrating teamwork and leadership skills.

CERTIFICATES

- **Python Full Stack Development** (Tech Amplifier) (03/2023 - 07/2023) I demonstrated proficiency in various programming languages including Python, HTML, CSS, Bootstrap, Django, and PostgreSQL.
